

## Tips & Tricks

### How to Suggest Listings on a Mobile device

When searching for properties in REALM, there are three ways you can suggest listings to a client.

#### To suggest all listings in a search (maximum of 200) on a mobile device:

1. Select the **action button**  on the right of the listings results.
2. Select **Suggest** from the drop down.
3. A suggest listings window will open, select a client, enter a comment, and select **Suggest**.

#### To suggest one or multiple properties from the search results window on a mobile device:

1. Place a **check**  in the box on the listings page for each desired property and then repeat steps 1, 2 & 3 above.

## To suggest an individual property from within a listing on a mobile device:

1. Select the **suggest icon**  in the menu at the top of the listing and repeat step 3 above.
