

## Tips for Success

### Match History in a Saved Search

The **Match History** tab displays all listings that match your saved search criteria since the date the search was created. This feature helps you track which properties have been shared, when they became available, and any status changes over time. Match History is available on both desktop and mobile for seamless access.

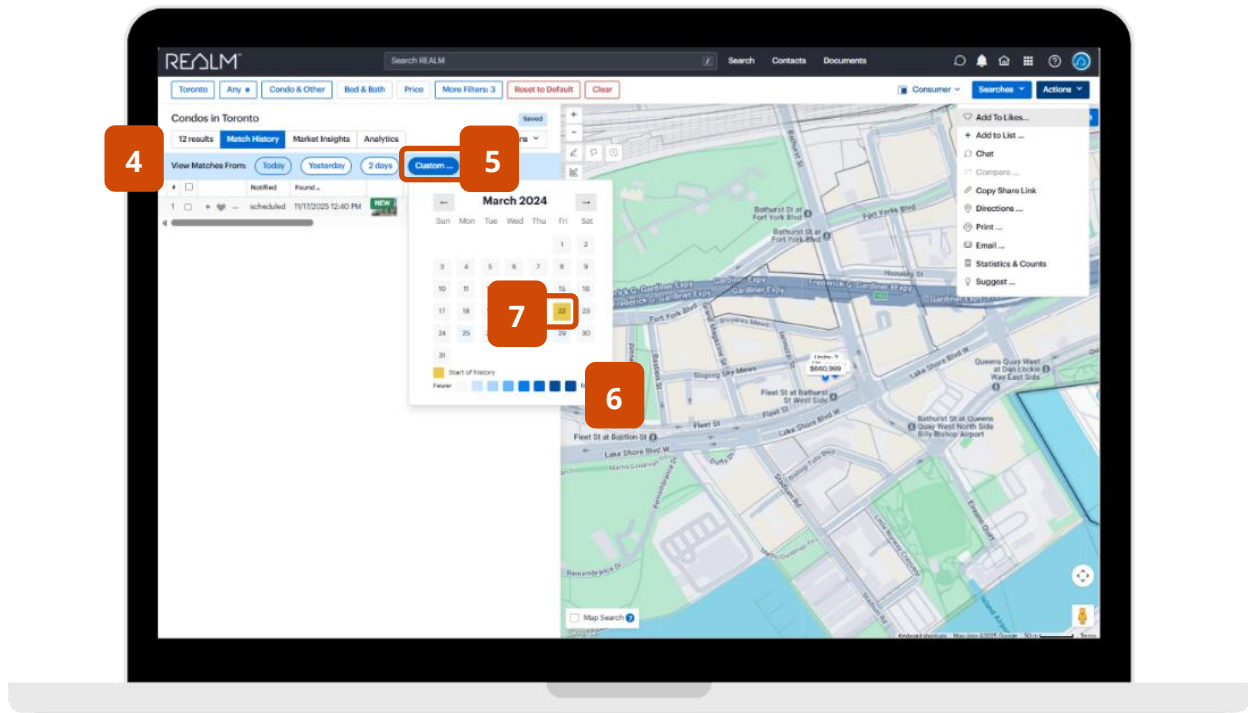

To review **Match History**

1. In a saved search, tap (or click on desktop) **Match History** from the search menu.
2. The window opens on today's date and displays any results.
  - The **Notified** column shows the status:
    - **Scheduled** = listing will be sent in the daily email.
    - **Sent** = the listing was sent based on the search settings.
    - **None** = no email will be sent based on search settings.
3. Tap (or click on desktop) the **Actions** button to choose an action to take with the result(s).

4. Tap (or click on desktop) **Yesterday**, **2 days** or **Custom** for earlier dates.
  - The **Notified** column shows the status:
    - **Sent** = the listing was sent based on the search settings.
    - **None** = no email will be sent based on search settings.
5. When you tap (or click on desktop) **Custom**, a calendar appears. Use the back arrow to navigate to the desired date.
6. Days highlighted in **blue** have matches. Tap the day to view the results.
7. The day highlighted in **yellow** marks the start of history. Tap it to see the listings from the original search.

**Note:** If the search is updated, the start date resets, and previous history will no longer be available.
